TEAM:

@Wietse Van Belle

@Michael Vandendriessche

A turn based grid shooter. Cleanse the world with the power of metal music 🎸

check if we can use following identifiers

- **Stress Free:** Give the player an option to play with the difficult greatly reduced (e.g. no enemies, no timer) =⇒ player is invincible

- **Mixtape:** Upload any music you make for your game online and share it under a Creative Commons license so that others can use it this year or in Global Game Jam 2023!

Story

General San Martino claims to be the writer of the Holy Rockinbook. He also claims to be the inventor of the martino sandwich, he has a sister called Martini (some say they are the same person). His face consists of patches of different skin color. No one knows his original skin color or where/who/how he got the skin samples from. He claims to be of every race to control as many people as possible. No one knows what skin color he is. No doctor or sexual partner has lived to tell the tale.

The Holy Rockinbook is like a rocking chair, but a book. It's paper is made from rock instead of wood. It obviously talks about the origins of rock and metal.

Brutus Ludus is the main character from the band. Brutus thinks everything is a game (which is why he sees everyone as a pawn on a board and battles are turn based. Like Kasuga Ichiban from Yakuza Like A Dragon.) He has a dragon tattoo 🐉. He wants to defeat evil no matter what. He enjoys beating up and killing bad guys.

Brutus mainly speaks in one liners.

Brutus needs to cleanse the corrupted souls of Martinos followers and destroy their body so they become one with the soil and become metal.

Martino spread his lies over his followers. For some reason he wants to kill Brutus and the band. His mindless followers try to overwhelm Brutus.

Quotes

Only a corrupted soul can call themselves a general and a Saint! (check for proper English)

These *lame*pions will never beat me! (said after killing champion enemies. pion is funny in dutch, because the enemies are inspired by chess pieces and board game pawns ♟)

I'm like a dragon! 🐉 (reference to yakuza 7)

You're only a mid-boss! (to Martino, reference Disgaea 1)

Alternatively : You were only a mid-boss (after killing Martino)

Duality

Martino is evil but he basically abolished racism which is obviously good.

Brutus wants to defeat evil but basically he just wants to kill which is obviously evil.

The enemy waves cause a duality of calm vs chaos.

Gameplay

Square grid

Turn based

Many enemies, one player

Player character (Brutus) attacks the enemies in Disgaea style battles

Turn based on entire team or per character? ⇒ entire team; first Brutus, then enemies

Wave based

3 waves is enough

- 1 wave grunts only

- 2nd wave grunts + champions

- 3rd wave some grunts, few champions and boss Martino

Some dialogue before, during, after battle

Brutus is invincible. When hit take 0 damage

for movement use arrow keys or wasd, zsqd. move the allowed amount of squares freely, then initiate attack

Attacks

- Holy Machinegun: attack in long cross ✚ pattern. Machine gun like guitar riff sound effect.

Enemies

- Grunt

- Champion

- Boss: Martino

Grunt only moves closer and overwhelms with melee. Like zombies 🧟

Champion moves to furthest within range of special attack. Can attack from a range as well as melee. 3 range ?

Boss: maybe he just stands there and talks. Or runs away. Or runs around randomly. Or only spawns new followers.

Controls

Using new Unity Input Manager

keyboard: wasd for movement, zsqd on azerty (automatically adjusts to keyboard layout!!!) or arrow buttons

controller: dpad or left stick for movement
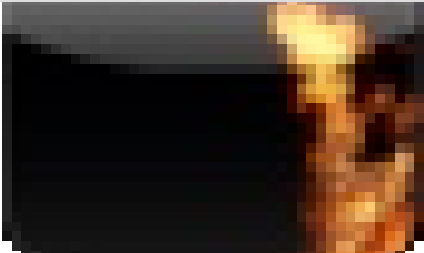

Metal band name generator

Ask player to type a band name

That bandname gets modified

Prefixes, suffixes, readable scramble

Affixes can also be empty

Add a random or empty prefix and suffix

Scramble user input but still in a readable and pronounceable way

Look for existing scramble techniques

Or make new one based on swapping

0 to 1 characters = no swapping

2 to 5 = 1 swap

6 to 8 = 2 swaps

9 to 11 = 3 swaps

Find a mathematical function to calculate number of swaps

Swap = vowel for vowel or consonant for consonant

Repeat until n# swaps reached

Aa Title	≡ Column 1
Death	God
Deth	Heim
Det	Eternity
Under	Cannibal
Skull	Beast
Bone	Demon
Hate	Darkness
Brutal	Goat
Ancient	Slayer
Dark	Era
Awakened	Blood
Steel	Powerplant
Lord of	Lord

- Great article on new unity input system!

Input in Unity made easy (complete guide to the new system)

Unity's new Input System is now out of preview and is an official part of Unity. Built as an alternative to the old Input Manager, the new Input System is fully featured, highly customisable... ...and confusing. While the new Input System can be more intuitive than the old Input Manager, it also has many more
